

Instructions for Student Presentation

Each team will give a 5-minute presentation on ***a practical experience of one member*** in the cereal chain (preferably in ancient/alternative grains). Practical experience means e.g., an internship, a visit to a company, a volunteer activity. The team should select the member that will give the presentation.

- 1. Begin your presentation by introducing your experience.** When and where did it occur?
- 2. Describe some facts about the experience.** What did you do there?
- 3. Offer some insights you gained from this experience.** What knowledge and skills did you gain?

If no one on the team has any practical experience, one team member should give a presentation on an aspect of ancient/alternative grains of interest e.g. innovative production or processing; eco-preservation; innovations in distribution and logistics are some examples.

Note that the 5-minute presentation time will be strictly enforced. Please rehearse your presentation to be sure it does not exceed 5 minutes. You should not have more than 5 slides.
